1

## Develop

# Build when inspiration strikes

Free developers from time-consuming, unnecessary processes that slow your work, so you and your team can focus on creating.

### The complete toolkit for the Web

Everything you need to build your site exactly how you imagine, from automatic API handling to built-in image and performance optimizations.

### Easy integration with your backend

Connect your pages to any data source, headless CMS, or API and make it work in everyone's dev environment.

### End-to-end testing on Localhost

From caching to Serverless Functions, all our cloud primitives work perfectly on localhost.

Works With 30+ Jamstack Frameworks

WORKS WITH 30+ FRAMEWORKS

2

## Preview

# Iterate with your team

Make frontend development a collaborative experience with automatic Preview Deployments for every code change, by seamlessly integrating with GitHub, GitLab, and Bitbucket.

## Push to deploy

Import your repo with one click, then push. Our built-in CI/CD system triggers for every code change.

## Get your Preview URL

Every Git branch and PR receives a live, production-like URL that everyone on your team can visit.
